Words understood by the AIBO® Entertainment Robot

In the following cases, the AIBO robot may not understand what you say.

While the AIBO robot is emitting sounds or moving, it cannot hear you easily.

The AIBO robot may not recognize several words depending on its mode or condition.

Even though the AIBO robot understands you, it may choose not to respond or do as you say.

The AIBO robot cannot hear you if its surroundings are noisy.

If you say a word whose pronunciation is unclear, the AIBO robot cannot recognize it. Speak very clearly.

If you repeat the same command over and over in rapid fire fashion, the AIBO robot will not understand you.

Calling the AIBO robot’s name

AIBO®/Registered name (the name you gave AIBO®).

The AIBO robot reacts when it is called. Even after the AIBO robot learns its own name, it reacts when you call it “AIBO®.”

Teaching the AIBO robot

Name registration

Give a name to the AIBO robot.

What’s your name?

The AIBO robot says the name you gave to it in its own voice.

Owner registered

You can teach the AIBO robot its owner’s name.

What’s your owner’s name?

The AIBO robot says its owner’s name (your name) in its own voice.

Favorite thing registration

You can teach the AIBO robot to recognize your favorite things as its own favorite things.

Praising, scolding, or encouraging the AIBO robot

Good AIBO®/Good boy/good girl.

These words are for praising the AIBO robot. They have the same effect as when you praise the AIBO robot by touching the sensors on the back of the AIBO robot.

Don’t do that.

These words are for scolding the AIBO robot. They have the same effect as when you scold the AIBO robot by tapping the sensors on the back of the AIBO robot.

Encourage the AIBO robot.

Say hello./Shake hands.

These words are for scolding the AIBO robot. They have the same effect as when you scold the AIBO robot by tapping the sensors on the back of the AIBO robot.

Greeting

Saying, thanking, or asking your friend.

How are you?

The AIBO robot says “I’m fine” and starts counting down to take a picture.

Moving

Climb over here/Over here/Stand up/Lay down/Turn right/Turn left/Move around for 5 seconds/Go back.

Questions for the AIBO robot

Are you sleepy?/Are you tired?/How are you?

The AIBO robot shows its state of progress with the face lights.

What’s your name?

The AIBO robot says the name you gave to it in its own voice.

What’s your owner’s name?

The AIBO robot says its owner’s name (your name) in its own voice.

What’s your AIBO’s skill level?

The AIBO robot shows its skill level.

What’s your physical skill level?

The AIBO robot shows its skill level.

What’s your walking skill level?

The AIBO robot shows its state of progress with the face lights.

Self-charge

Charge the AIBO robot.

Plug the AC adapter into an AC outlet, and place the AIBO robot on the Energy Station. (For information on appropriate locations to place the Energy Station, refer to the “User’s Guide (Basic)” for the AIBO robot ERS-7.)

Install the AC adapter cable and foot stopper.

Route the AC adapter cable along the wire guides and attach the foot stopper.

Place the AIBO robot on the floor in this position.

Place the AIBO robot on a flat, non-slippery surface, such as a low pile carpet with a hard nap.

Press the Pause button.

The Pause mode ends and the operation light turns green. In a moment, the AIBO robot will automatically begin moving!

Install the station marker and station pole.

Attach the station marker as shown.

Attach the station pole.

Attach the station marker and station pole.

Attach the station marker first, followed by the station pole.

If you don’t want to use the self-charging function, these attachments are not necessary.

The AIBO® Entertainment Robot feature and mode map

When the AIBO robot is in Autonomous mode, all the activities and settings shown below are possible. When the AIBO robot is in Station mode (when it is awake), all the activities and settings shown below except those marked with an asterisk (*) are possible.

### Station mode
On the Energy Station, the AIBO robot wakes up and goes to sleep at a preset time.

- **When the AIBO robot is awake**
  - The AIBO robot mounts the Energy Station by itself.
  - The AIBO robot is placed on the Energy Station while active.
- **When the AIBO robot is sleeping**
  - At bedtime the AIBO robot falls fast asleep. If you remove the AIBO robot from the Energy Station outside its set activity period, it will enter Autonomous mode.
  - The AIBO robot is removed from the Energy Station.

### Autonomous mode
The AIBO robot moves around on its own. The AIBO robot collects information via its camera/microphones/sensors and acts autonomously based on its own feelings and instincts.

- **Mode indicators OFF**
- **Mode indicators turn blue (Autonomous Monitor mode*)**
- **Start AIBO Entertainment Player**
- **End AIBO Entertainment Player**

#### Mode indicators
- **Mode indicators OFF**
- **Mode indicators turn blue (Autonomous Monitor mode*)**

#### Sensors
- **Head sensor**
- **Back sensor**

### Remote Control mode*
The AIBO robot is controlled by AIBO Entertainment Player software on a remote PC. The AIBO robot is connected to a PC via wireless LAN. With these modes, you can control the AIBO robot from a remote PC and monitor the images and sounds it detects.

- **Mode indicators flash blue**
- **Start AIBO Entertainment Player**
- **End AIBO Entertainment Player**

### Game mode
The game starts!

- **Mode indicators turn pink**
- **Touch the front (blue) back sensor**

### Voice Guide mode
You can check the voice guide, touch the head sensor for 3 seconds to return the AIBO robot to Autonomous mode.

- **Mode indicators turn blue**
- **Touch the head sensor for 3 seconds**

### Setup mode
You can set up the following:
- **Wake-up time for the AIBO robot**
- **Bedtime for the AIBO robot**
- **Hourly alert ON/OFF**

- **Touch the forward (red) back sensor**
- **Touch the rear (orange) back sensor**
- **Touch the middle (orange) back sensor**

### Energy Station
dismount setup
When self-charging is complete, the AIBO robot will dismount the Energy Station by itself.

- **Dismount setup**
  - The AIBO robot is removed from the Energy Station by itself.
  - The AIBO robot dismounts the Energy Station.
  - The AIBO robot is placed on the Energy Station.

### Development control
You can also have fun raising the AIBO robot from the puppy stage.

- **Setup**
  - The AIBO robot is removed from the Energy Station.
  - The AIBO robot is placed on the Energy Station.

### Clock setup
You can set up the following:
- **Wake-up time for the AIBO robot**
- **Bedtime for the AIBO robot**
- **Hourly alert ON/OFF**

- **Touch the front (blue) back sensor**

### Energy Station
When the AIBO robot is in Autonomous mode, it goes straight into the mode to set up the time you want it to wake up.

### AIBO EYES
You can check the AIBO robot’s motions.

- **Mode indicators turn yellow**
- **Message received**

### Record mode
You can record a message or voice signature with AIBO EYES feature.

- **Mail received**
- **Message received**

### Alarm ON/OFF
Have the AIBO robot wake you up!

- **Keep the AIBO robot awake!**
- **Show “Alarm Off/On/Off” card**

### Setup
You can set up the following:
- **Wake-up time for the AIBO robot**
- **Bedtime for the AIBO robot**
- **Hourly alert ON/OFF**

- **Touch the front (blue) back sensor**

### Rest mode
The AIBO robot does not move around. In this mode the AIBO robot stays still and does not respond to voice commands, other sounds, or show interest in the ball and AIBOnet toy.

#### Jam condition
If something gets jammed in any of the AIBO robot's joints, the AIBO robot goes into this condition and all of its joints become loose. This mode is provided to protect your fingers from being caught between the AIBO robot's joints.

- **Face bottom, turn pink**
- **Touch the head sensor for 3 seconds**

### Pause mode (inactive condition)
When you press the “Pause” button on the back of the AIBO robot, the AIBO robot will enter the inactive condition and the pause button will turn pink. If you press the “Pause” button in this condition, the AIBO robot will return to Autonomous mode.

- **Pause button on the back of the AIBO robot**
- **On the back of the AIBO robot**

### Alert
The AIBO robot wakes you up!

- **Alarm**
  - **Show “Alarm Off/On/Off” card**
  - **Touch the front (blue) back sensor**

### Energy Station
When self-charging is complete, the AIBO robot will dismount the Energy Station by itself.

- **Dismount setup**
  - The AIBO robot is removed from the Energy Station by itself.
  - The AIBO robot dismounts the Energy Station.
  - The AIBO robot is placed on the Energy Station.

### Development control
You can also have fun raising the AIBO robot from the puppy stage.
