CoAKTinG

in the Grid

**I-X / <I-N-C-A>
Process Panels &
Intelligent Messaging**

HyStream: meeting annotation and replay

**BuddySpace: awareness of presence
Compendium: mapping of meetings**

The CoAKTinG Project aims to support e-Science collaboration by integrating and demonstrating the utility of:

intelligent task-orientated messaging, collaborative planning, issue, activity and constraint management (I-X Process Panels/<I-N-C-A>: AIAI, Edinburgh)

peripheral awareness of the online presence, availability, attributes and location of colleagues, documents, and devices (BuddySpace: KMi/OU)

real time conversational mapping of meetings, providing shared visual focus and group memory capture (Compendium: KMi/OU)

multimedia meeting mark-up, replay and navigation (HyStream: IAM/Southampton)
