

KSCO 2002

2nd International Conference on Knowledge Systems for Coalition Operations

**Toulouse, France
23rd and 24th April 2002**

This conference will bring together practitioners and key decision makers in coalition operation management together with researchers from areas of knowledge representation and reasoning, planning and multi-agent systems to exchange experience and ideas, share inspiration, and suggest novel concepts. Practitioners will benefit from meeting each other and from learning possibilities of research achievements, while researchers will get inspiration from each other and potential end users of their ideas.

Requests for invitation or offers of presentations should be sent by e-mail to the Conference Secretariat ksco-2002@aiai.ed.ac.uk and are due 31st October 2001. See <http://www.aiai.ed.ac.uk/project/coalition/ksco/ksco-2002.html> for details.

The conference is organized alongside AIPS-2002 (April 25–27) and KR-2002 (April 22–25) — see <http://www.laas.fr/aips/>.

As well as appearing in the conference proceedings, the best papers will appear in a Special Issue on Knowledge Systems for Coalition Operations of *IEEE Intelligent Systems* in mid 2002.
